EXPERIENCE

White Cloak Technologies

Philippines

Launchpad Program – Full-Stack Developer

May 2026 – June 2026

- Completed White Cloak Technologies' intensive one-month Launchpad Program, shipping a full-stack web application in each of three consecutive build rounds under weekly deadlines.
- Round 1 – Agapay Telehealth Platform:** Built a full-stack telehealth MVP for the Philippine healthcare system, enabling patients to book consultations with specialized doctors, review medical history, and access health resources. **Technology Stack:** Next.js 15 (App Router), React 19, Tailwind CSS, PostgreSQL with Prisma, and NextAuth.js v5 credential authentication.
- Round 2 – Hirejia rebuild:** Rebuilt Hirejia, an AI-powered recruitment platform spanning automated CV screening and candidate communication. **Technology Stack:** Next.js 15+ (App Router), React 19, Bootstrap 4 (argon-design), SASS, MongoDB, Firebase Authentication, React Context API, SWR, TanStack Table, Web Push (VAPID), and OpenAI (AI screening & CV digitalization); Mailgun and Cloudflare R2 for email and file storage.
- Round 3 – Jia HR platform (two-module MVP):** Delivered a two-module MVP of an employee-lifecycle HR platform for a healthcare provider: People Management (directory, org chart, onboarding/offboarding, role-based access) and Performance Management (pulse surveys, competency exams, evaluations) — built on Next.js 16 (App Router / RSC), Supabase, and Prisma with server-side authorization and append-only audit logging. **Technology Stack:** Next.js 16 (App Router / RSC), TypeScript, Supabase (Auth + PostgreSQL), Prisma, Tailwind CSS with shadcn/ui, TanStack Query/Table, react-hook-form with Zod, and Resend.

Google Developer Student Club (GDSC) PLM

Manila, PH

Cloud Developer Googler

September 2025 – Present

- Collaborated within the Cloud development team to research and implement Google Cloud Platform (GCP) solutions for student-led initiatives and technical projects.
- Contributed to technical workshops and Study Jams by assisting peers in understanding cloud architecture, deployment, and infrastructure management.
- Supported the Technology Operations committee by evaluating project feasibility and providing technical insights for organization-wide initiatives.

Lay Bare Franchising Corporation

Mandaluyong, PH

IT Intern Lead

June 2025 – July 2025

- Engineered full-stack automation solutions to modernize legacy IT processes, enhancing data integrity and operational efficiency across the organization.
- Designed and implemented multiple low-code applications using AppSheet integrated with Google Workspace, automating asset tracking and inventory management for over 100 IT assets.
- Automated recurring IT operational tasks including user account setup and report generation using Google Apps Script, saving 5+ hours of manual effort per week.
- Maintained and enhanced internal company portals and knowledge bases using Google Sites, supporting over 500 employees with streamlined information access

SKILLS

TECHNICAL SKILLS:

- Languages:** Java, Python, TypeScript, JavaScript, SQL, C++
- Frameworks & Libraries:** React, Next.js (App Router), Django, Zappa, Flask, Tailwind CSS, shadcn/ui, Bootstrap, SASS, Prisma, SWR, TanStack Query & Table
- Cloud & Backend:** AWS (S3, RDS, Lambda, API Gateway, CloudFront, WAF, Shield, KMS), Google Cloud Platform (GCP), Supabase, Firebase, Vercel; CI/CD (AWS CodePipeline & CodeBuild)
- Databases:** PostgreSQL, MongoDB, MySQL

- **AI & Integrations:** OpenAI & Groq (LLM APIs), NextAuth.js, Resend, Mailgun, Cloudflare R2, Web Push (VAPID)
- **Security & Networking:** VPN (IPsec), VLAN, OSPF/EIGRP routing, ACLs, Network Security
- **Tools & Automation:** Git & GitHub, VS Code, Figma, Cisco Packet Tracer, AppSheet, Google Apps Script, Google Workspace

NOTABLE PROJECTS

Multi-Site Network Design & Implementation

December 2025

Networks and Communication Subject

- Designed and configured a secure multi-site network topology in Cisco Packet Tracer connecting five branch locations (Makati, Manila, Puerto Galera, Laguna, Cebu).
- Established site-to-site IPsec VPN tunnels using Makati as the central hub to ensure secure encrypted communication across all branches.
- Implemented OSPF/EIGRP routing protocols for dynamic route sharing and deployed essential network services including DHCP, DNS, SMTP, and Telnet/SSH.
- **Technology Stack:** Cisco Packet Tracer, IPsec VPN, OSPF, EIGRP, Access Control Lists (ACLs).

Kinetiq Manufacturing ERP System

May 2025

GitHub Repository: <https://github.com/Kinetiq-PLM>

- Architected core AWS infrastructure for a manufacturing ERP system using S3, RDS PostgreSQL, Lambda, API Gateway, CloudFront, WAF, Shield, and KMS.
- Developed serverless backend APIs with Django and Zappa and built the React shell application for manufacturing operations workflows.
- Led API and database integration across cloud services and supported development access to RDS through SSH tunneling and EC2.
- Built the React-based shell application for responsive access to manufacturing operations features.
- Implemented CI/CD pipelines with AWS CodePipeline and CodeBuild to streamline deployment.

CStar Compiler

May 2025

GitHub Repository: <https://github.com/matchi-1/CStarCompiler>

- Designed and developed CStar, a modern multi-paradigm programming language inspired by C and C++ with improved readability and streamlined syntax.
- Built core compiler stages including lexical analysis, syntax analysis, semantic analysis, and transpilation using formal language and automata principles.
- Integrated selected language features inspired by Python and Java while preserving core systems-level concepts from C/C++.
- **Technology Stack:** Flask, Python, React, Javascript, CSS, Google Cloud Platform, Websockets

EDUCATION & HONORS

Pamantasan ng Lungsod ng Maynila, local public university

Manila, PH

College of Information Systems and Technology Management (CISTM)

Bachelor of Science in Computer Science

September 2022 – August 2026

- **Academic Honors:** Magna Cum Laude (GWA: 1.36148)
- **Relevant Coursework:** Object-Oriented Programming, Data Structures and Algorithms, Algorithms and Complexity, Information Management, Information Assurance and Security, Programming Languages, Software Engineering, Intelligent Systems, Applications Development and Emerging Technologies, Computational Science, Networks and Communication
